Hako

***For increasing hygiene requirements
Preventing. Cleaning. Disinfecting.***

Walk-behind and ride-on scrubber-driers

Scrubber-driers

Hygiene is becoming more and more important not only in particularly hygiene-sensitive environments. In order to meet all disinfection requirements perfectly, Hako scrubber-driers can be upgraded with optional tools. The disinfectants in the chemical container are applied through the on-board chemical dosing system by the brush head or the hand spray lance. Alternatively, the disinfectants can be added to the clean water in the solution tank.

- 1 Hand spray lance
- 2 Brush unit

Hygienic in every detail

From large to small areas and down to very small details: Hako offers perfectly adapted options for applying disinfectants. Our clever solutions ensure that Hako scrubber-driers not only provide excellent cleaning results but also make a valuable contribution to preventing and containing the transmission of pathogens via contaminated surfaces.

The benefits of combining cleaning with disinfecting:

- only one machine for cleaning and disinfecting
- easy handling
- solutions for all areas: automated disinfection via the machine's brush unit (standard equipment) and the spray bar or manual disinfection via the hand spray lance
- improved hygiene and cleanliness
- flexible application

Using the solution tank for disinfectants

When the cleaning task is completed, the solution tank is used to apply the disinfectant/water mix directly to the floor or other surfaces via the disc brush head, the spray bar or the hand spray lance. Suitable for disinfecting large areas, e.g. in the logistics or food processing sectors.

- 1 Solution tank containing the disinfectant/water mix
- 2 Brush unit for disinfection tasks
- 3 Spray bar for disinfection tasks
- 4 Hand spray lance for disinfection tasks

Hako-AntiBac®

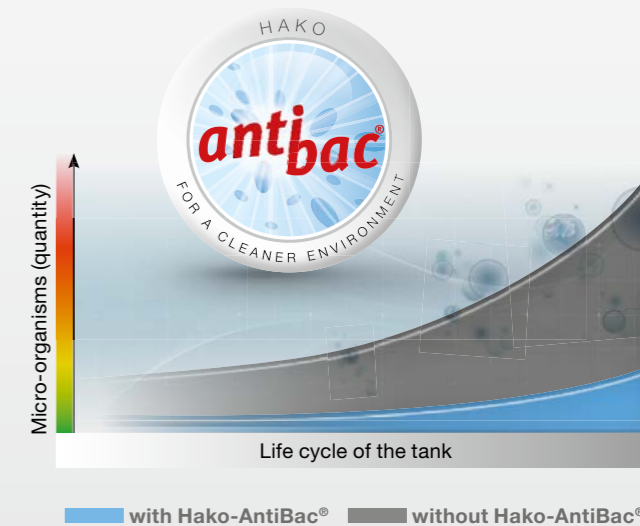

Protects both people and your cleaning equipment

Equipping the solution and recovery tank with Hako-AntiBac® improves the hygiene of the machine itself. This innovative antibacterial feature protects the plastic material of the tanks and reduces the development of fungal and bacterial growth to meet even the highest hygiene standards with minimum cleaning effort.

More benefits provided by Hako-AntiBac®:

- Improved hygiene and reduced odour development
- Protects your employees through reduced contact with micro-organisms
- Protects the environment and reduces costs through a lower consumption of tank cleaning disinfectants
- Extends the tank's service life

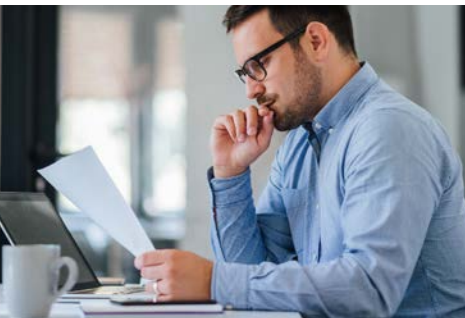

Hako-Aqua-Control
Save up to 50% water with Hako scrubber-driers: with intelligent brush systems and automatic water stop when the machine comes to a halt.

Hako's all-round carefree package

We back up your business:
with excellent technical and digital
services as well as attractive pro-
curement alternatives.

Hako supports you in achieving your goals: with 650 field technicians based throughout Europe and GPS-controlled deployment planning to ensure maximum availability of your machines around the clock. Whenever needed, our efficient spare part logistics guarantees direct over-night delivery of original spare parts. Our online-based Fleet-Management tool enables transparent, optimised use of your machine fleet, and the recorded data can be used as a performance record for your clients. What's more, we offer attractive and economically efficient rental and leasing options for increased flexibility – perfectly adapted to our customers' requirements.

Attractive financing alternatives

Efficient machines and excellent services as a complete package with fixed, calculable ownership costs over the entire life cycle of your machines. Individually customised and with maximum flexibility.

Leasing options –
customised to meet
individual customer
requirements.

Rental contract
ALL-IN-plus: financing,
maintenance and
insurance included!

Hire-purchase –
customised monthly
payments in line
with your liquidity.

Adapt your rental
payments to your
seasonal earnings.
