SWEEPMASTER

*Hako walk-behind sweepers
and vacuum sweepers*

*Thoroughly cleaned floors
in each and every corner*

Sweepmaster M600

Sweepmaster B500

Sweepmaster 650

Sweepmaster 800

Area performance: from 2,300 to 4,350 m²/h

A whole series of benefits

Operating comfort inclusive

Sweepers and vacuum sweepers made by Hako ensure fast and easy cleaning processes with outstanding results: thanks to their comfortable operating concept, ergonomic design of the steering bar, and excellent view onto the working area.

Hako DustStop

The side-broom jacket Hako DustStop reduces the development of dust and fine particulates during dry sweeping by up to 90% in comparison to conventional side brooms.

Outstanding performance

Sweepmaster walk-behind sweepers and vacuum sweepers made by Hako provide excellent results on carpets and hard floors. Available in different working widths and equipped with petrol-powered drive systems for outdoor use or battery-powered drives for indoor application, Hako offers the right solution for every sweeping task. In addition, powerful dust filters ensure clean exhaust air. The machines are equipped with large-capacity dirt hoppers to ensure long hours of uninterrupted working. Clever details such as the comfortable hopper emptying system and easy-to-clean filters ensure uncomplicated in-between machine maintenance.

Perfect for every application

Hako Sweepmaster machines are extremely robust and flexible and therefore ideal for cleaning workshops, production facilities, carpeted floors, or paved outdoor areas with a consistently high performance.

Absolutely clean
 The highly manoeuvrable and easy-to-use model Sweepmaster B500 is particularly suited for cleaning carpets.

Sweepmaster M600 / B500

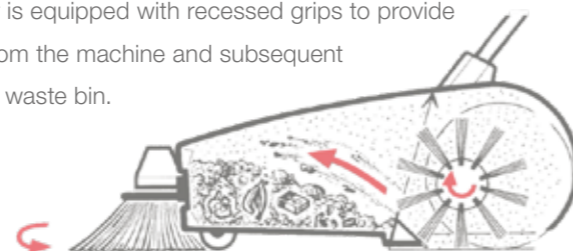

From simple to demanding

Providing an area performance of up to 2,300 m²/h, the Sweepmaster M600 is the perfect solution for cleaning small in- and outdoor areas. The machine's low weight and easy handling characteristics ensure that even gutters, steps and stairs are no problem at all for the user. Thanks to its impact-resistant steel frame design, solid aluminium housing and indestructible dirt hopper, the Sweepmaster M600 is ideal for industrial applications.

Fast and easy cleaning

The side broom removes dust and dirt from corners and edges, and sweeps it into the path of the wide sweeping cylinder. The dirt hopper is equipped with recessed grips to provide easy removal from the machine and subsequent emptying into a waste bin.

Outstanding performance in a compact design

The Sweepmaster B500, Hako's smallest motorised vacuum sweeper, offers an outstanding area performance of up to 2,400 m²/h. Both the fully usable 40-litre-capacity dirt hopper – the largest in its class! – and the maintenance-free battery system guarantee long hours of uninterrupted working. The powerful suction fan in combination with the efficient filter system provide effective dust control to ensure low-dust sweeping. When the job is done, the machine's on-board charger enables uncomplicated charging at any mains outlet.

Features and benefits at a glance:

- 60 and 67 cm working width
- Area performance up to 2,400 m²/h
- Robust steel frame design and a solid aluminium housing (Sweepmaster M600)
- Easy handling
- Clearly structured control display with easy-to-read symbols (Sweepmaster B500)

Sweepmaster 650

Excellent results – both in- and outdoors

Providing an area performance of up to 2,600 m²/h – or even up to 3,525 m²/h when equipped with a side broom, the Sweepmaster M650 provides excellent cleaning results, right up to walls and edges and even in curves, thanks to the widely overlapping side broom. The machine works with the clever overhead-thruster principle, which allows maximum filling of the dirt hopper. For uninterrupted working and excellent sweeping results. The Sweepmaster 650 is available with a petrol engine for outdoor use or a battery drive for indoor application.

Perfect for indoor applications
Equipped with a maintenance-free battery drive, the Sweepmaster B650 variant is suitable for working indoors, and the on-board charger enables uncomplicated recharging at any mains outlet.

Less dust and fine particulates
DustStop (option) reduces the development of dust and fine particulates during dry sweeping by up to 90%.

Sweeping close to walls and edges

Area performance up to 3,525 m²/h

Emptying made easy

The Take-it-Easy dirt hopper system of the Sweepmaster 650 enables uncomplicated emptying: The steering bar folds up to allow easy removal of the dirt hopper, or manual input of debris that cannot be swept up by the machine.

Flexible application options

If used to clean both hard and carpeted floors, the Sweepmaster 650 can be upgraded with an optional Carpet-Kit to provide thorough yet gentle cleaning of carpets – without any loss of performance.

Features and benefits at a glance:

- 70.5 cm working width
- Area performance up to 3,525 m²/h
- Take-it-Easy dirt hopper system
- Available with an economical petrol engine for outdoor use, or a maintenance-free battery drive for indoor application
- Optional equipment: Carpet-Kit

Take-it-Easy dirt hopper system

Area performance up to 4,350 m²/h

Sweepmaster 800

Professional sweeper for excellent results

The Sweepmaster 800 provides cleaning of small to medium-sized areas with excellent results and flexible application options, because the machine is available with an economical petrol engine for outdoor use, or a maintenance-free battery drive for indoor application, as well as an optional Carpet-Kit. Its robust steel frame design is ideal for heavy-duty applications with a convincing area performance of up to 4,350 m²/h.

DustStop(option) reduces dust and fine particulate emissions at the side broom by up to 90%.

Take-it-Easy: for uncomplicated emptying

Hako's Take-it-Easy dirt hopper system enables uncomplicated manual emptying. The two dirt hoppers can be removed and emptied separately to ensure that the weight is distributed more evenly. The steering bar folds up and out of the way, which makes it easier to open and remove the hoppers from the machine, or to throw in larger pieces of debris by hand.

Features and benefits at a glance:

- 87 cm working width
- Area performance up to 4,350 m²/h
- Take-it-Easy dirt hopper system
- Available with an economical petrol engine for outdoor use, or a maintenance-free battery drive for indoor application
- Optional equipment: Carpet-Kit

Which machine is the best for your requirements?

Our comprehensive range of Sweepmaster walk-behind vacuum sweepers offers machines for every application, from cleaning small to medium-sized areas. The table below helps you to find the best machine solution for your individual tasks:

Sweepmaster	M600	B500	P/B650	P/B800
Area performance in m ² /h	2,300	2,400	3,525	4,350

* Battery-powered variant

Available 24/7, quickly on site when needed

Coordinated by a GPS-controlled assignment planning system, 650 field technicians are available for you around the clock to ensure maximum machine availability and minimum downtimes. In addition, our highly efficient spare part logistics guarantees direct over-night delivery of original spare parts.

Hako-Fleet-Management

Hako's online-based fleet management tool records all relevant key data of your cleaning machines for central processing and subsequent retrieval via PC or mobile device at any time and place. view.X enables economically efficient use and management of your fleet of machines. In addition, view.X.live transmits important operating data almost in real time; and the electronic machine access authorisation module entry.X prevents unauthorised use.

Quality easily financed

We offer you attractive, customised rental and leasing options for more flexibility and cost-efficiency.

Easy access to all relevant components ensures uncomplicated maintenance and servicing.
